The FDNY, in partnership with the FDNY Foundation, is hosting the 4th annual Medical Special Operations Conference (MSOC). This conference serves as an important venue for Military, Federal, State and Local medical operators and planners to share experiences. It also provides an opportunity to learn from other stakeholders and obtain insights from experts in the field on how to improve the response framework within the medical special operations community.

The MSOC will take place over three days consisting of workshops, lectures, panel discussions, hands-on skills stations and a vendor's showcase with some of the latest equipment and products. Optional pre-conference activities are available; including workshops, a visit to the World Trade Center site and a welcome reception at the New York City Fire Museum.

-- Space is limited so please Register Now --
